

To Whom It May Concern

My name is and I have diabetes.

I need to carry a blood glucose test kit with me at all times so that I can check my blood glucose levels. My blood glucose test kit contains the following items:

- Blood glucose meter
- Blood glucose test strips
- Lancing device
- Lancets
- Medication

I have been advised to carry my blood glucose test kit in hand luggage. The technology used by the meter and test strips means their performance can be affected by extremes of temperature. The temperature in the hold is not suitable.

Thank you.
